

NATIONAL POWER LINE COMPANY (OVIT ZRT.)

As a member of MVM Group, OVIT has the widest scope of activities among Hungarian companies engaged in building electricity networks. The Company has performed the construction, operation, maintenance and development of high-voltage power lines and transformer stations for six decades. Traditionally the activities of OVIT have been basically connected to the Hungarian national grid and power plants, but it also regularly concludes contracts with domestic electricity supply companies, large industrial consumers and foreign ordering parties for completing construction, maintenance, renewal and development assignments.

The scope of operations of the Company covers the entire area of Hungary; it has sites in several regions of the country. OVIT performs its conventional activities and extensive qualified businesses in an essentially market-oriented system.

Strategic business areas of OVIT:

- planning, construction, expansion and reconstruction of power lines and substations;
- maintenance, investment and establishment of power plants;
- manufacture of industrial steel structures;
- operation of the power supply systems of industrial facilities;
- transportation by road, rail and water of special large and heavy goods;
- specialist services;
- manufacture of low-voltage auxiliary equipment;
- operation, implementation and renewal of telecommunications networks.

Furthermore, OVIT operates a three-star hotel in Keszthely at Lake Balaton, in one of Hungary's most beautiful places. (www.hotelovit.hu)
