### Objectives of the Conference:

The International Scientific Conference aims to serve as a forum for an interchange of experience and a presentation of research results and practical applications, as well as a place of the meeting of workers from universities and industry who devote themselves to research and technical activities.

### Conference Topics:

The International Scientific Conference focuses on key problems of today's power engineering that stem both from technical and economic needs of power industry. It deals also with research activities of development institutions and universities.

### Main Topics:

Operation of Electrical Power System - Reliability and Safety - Power Stations - Control of Electrical Power System - Heating Systems - Electrical Technology - Energy Storage - Electrical Power Transmission and Distribution - Electrical Machines and Devices - Diagnostics and Maintenance - Power electronics - Electric light - Renewable Energy - Power system protection - Information systems - Innovative Educational Methods

### Venue:

Hotel Dlouhé Stráně ( [www.hotelds.cz/en/](http://www.hotelds.cz/en/) ). The Hotel is situated 100 m from train the Kouty nad Desnou train terminal in the north part of the highest Moravian mountains the Jeseníky.

### Registration of Participants:

The complete registration forms will be available on the website of the conference.
