Conference Objectives

The International Scientific Conference aims to serve as a forum for an **interchange of experience** and a **presentation of experimental results** and **results of research**, as well as a place of meeting of workers from universities and industry who are devoting research and technical activities.

Conference Topics

- Power Systems Planning and Development
- Power Systems Reliability and Maintenance, Asset Management
- New Trends in Electrical Power Transmission, HVDC, WAMPaC
- Advanced Distribution Systems, Smart Grids, Micro Grids
- Renewable Energy Sources and Storage Devices
- EMC, Power Quality Measurement and Improvement
- FACTS Controllers in Transmission and Distribution Systems
- High Voltage Technology, Measurements and Diagnostics
- Transient Voltages, Insulation Coordination, Overvoltage Protection
- Electrical Machines, Drives and Power Electronics
- Smart Artificial Outdoor and Indoor Lighting Systems
- Electrical Heat in Industrial Technologies and Intelligent Buildings
- Nuclear Energy Research, Utilization and Safety

Registration

Registration fees will be announced at the conference website. **On-line registration** will be opened at the conference website in December 2017.

Each paper must be presented at the conference by one of the authors to be published in the conference proceedings.

Conference Language **English**
