Conference Objectives:

The International Scientific Conference goals are to serve as, a forum for an interchange of experience ; a presentation of research findings and practical applications ; a place of meeting for university scientists and industry workers who engage in research and technical activities.

Conference Topics:

The International Scientific Conference focuses on key problems of today's power engineering that stem from both technical and economic needs of the power industry. It also deals with research activities of development institutions and universities.

Main Topics:

Operation of Electrical Power System - Reliability and Safety - Power Stations - Control of Electrical Power System - Heating Systems - Electrical Technology - Energy Storage - Electrical Power Transmission and Distribution - Smart Grids / Cities / Technologies - Renewable Energy - Electric light - Diagnostics and Maintenance - Electrical Machines and Devices - Power electronics - Power system protection - Information systems

Venue:

Hotel Dlouhé Stráně (www.hotelds.cz/en). The Hotel is situated 100 m from the Kouty nad Desnou train terminal in the north part of the Jeseníky mountains - the highest Moravian mountains.

Participant Registration:

The complete registration forms will be available on the conference website.
