

Dear partners,

As usual with pleasure, we offer to companies the possibility of presentation in following categories during the EPE conference. Basic presentation includes propagation leaflet inserted into conference proceedings, while extended presentation gives facilities for your own exposition or a poster. We also offer the possibility of participation on the conference by means of a partnership level. Naturally we also embrace non-commercial, specialized presentation of your company research and development results.

About 200 participants are attending the conference annually, where most of them are coming from universities, important and leading electrical power engineering companies and also from small and middle range companies focused on power engineering industry in wider spectrum from high-current and heat devices to measurement and automation techniques and support services. The conference is established as an international forum with attendees from around the world.

### Price and range of advertising

Advertising type	Price of advertising (excl. 21% VAT)
